

# DATA CENTER SOLUTIONS

# FIBER OPTIC NETWORKS

Founded in 2003, SAMM Technology offers cutting-edge products and services in the fields of telecommunication infrastructure and data center by producing in line with the expectations and needs of its customers.

With more than 20 years of experience, SAMM Technology has become one of the important suppliers of Europe in terms of capacity, technology and innovation by continuously investing in production, technology, R&D and people.

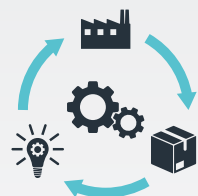

SAMM Teknoloji produces high performance fiber optic cables, fiber optic cable assemblies, data center infrastructure products and structured cabling solutions in its two factories located in the Gosb/Gebze industrial zone.

SAMM also has a ministry-approved research and development center since 2017.

## 20+ Years Experience

With more than 200 employees and 2 factories, we have achieved several significant projects in telecommunication fiber optic infrastructure.

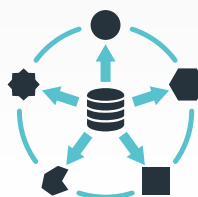

## World Class Production

With systematic and scientific methods, we always focus on reaching the highest quality in our fiber optic cable production and assembly lines.

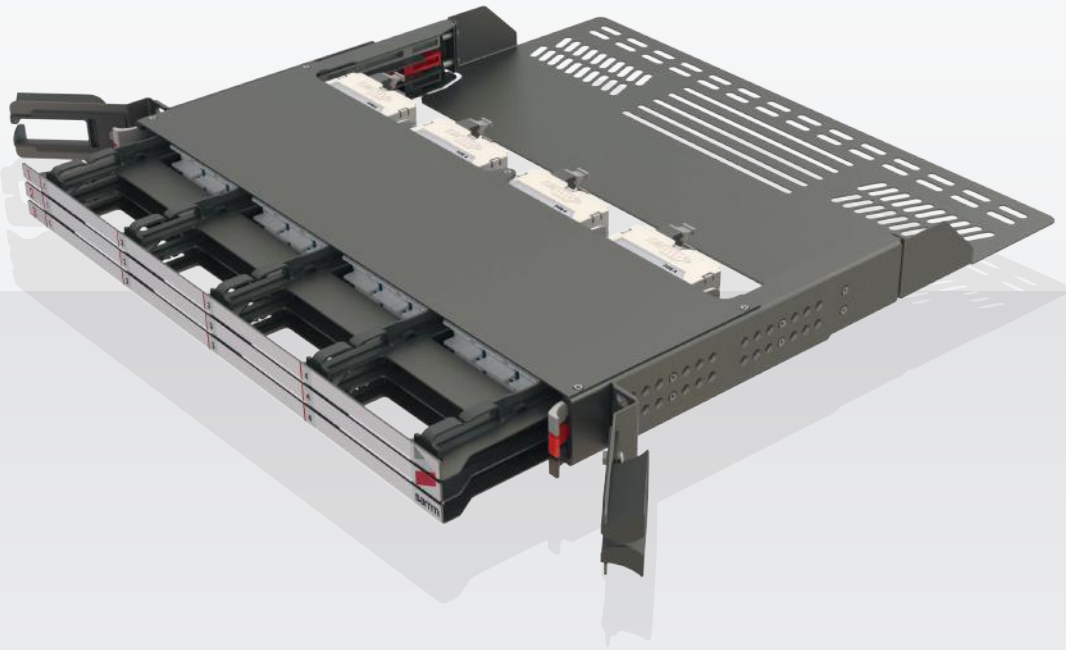

## Connecting Continents

An advantageous shipping location, at the intersection of Asia, Europe and the Middle-East.

## Innovative Solutions

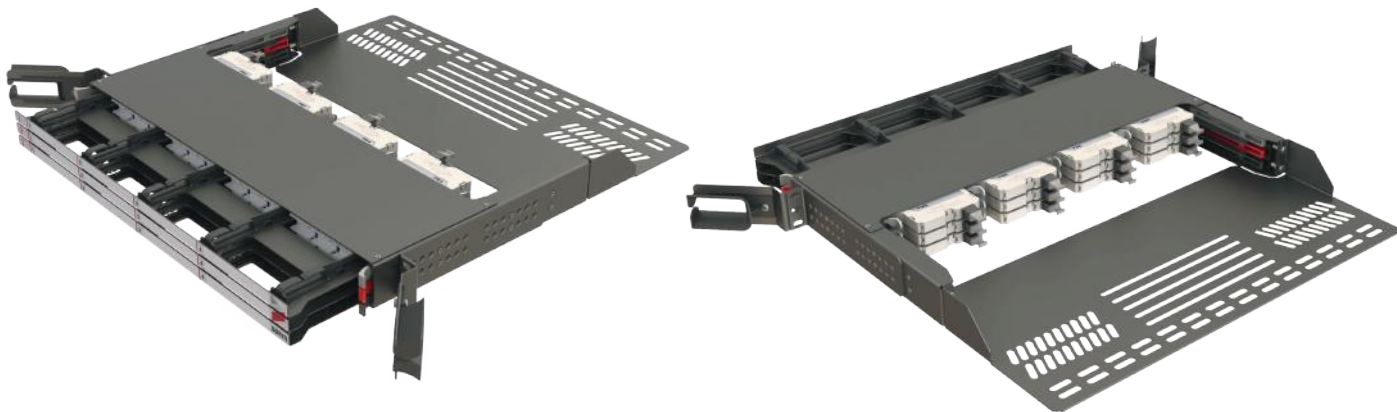

We are passionate about responding to customer demand and keeping pace with the ever evolving telecommunication and fiber optic technologies.

## **Data Center Fiber Optic Networks**

## Modular Ultra High Density Panels | G-Connect Series

These panels are designed to accommodate Base-8 and Base-12 variety solutions in a high density and new generation structure. The modular construction combines highest port density with installation ease. A maximum of 144 LC connections can be stacked in 1U section, within 12 UHD modules.

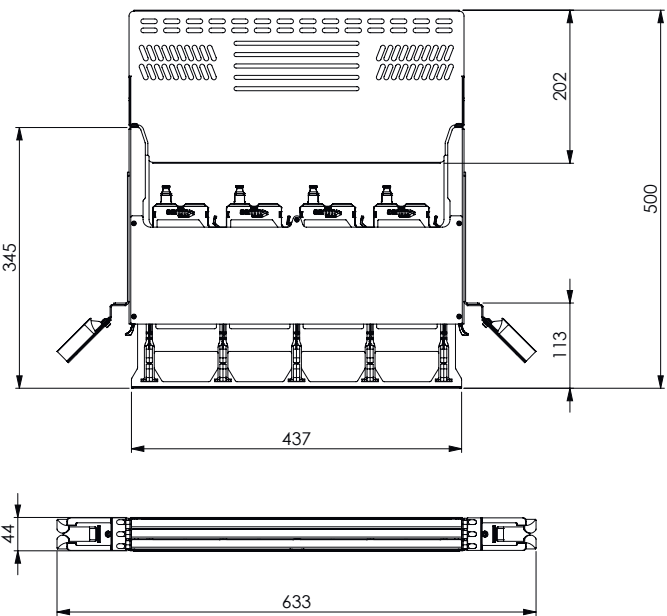

### Features

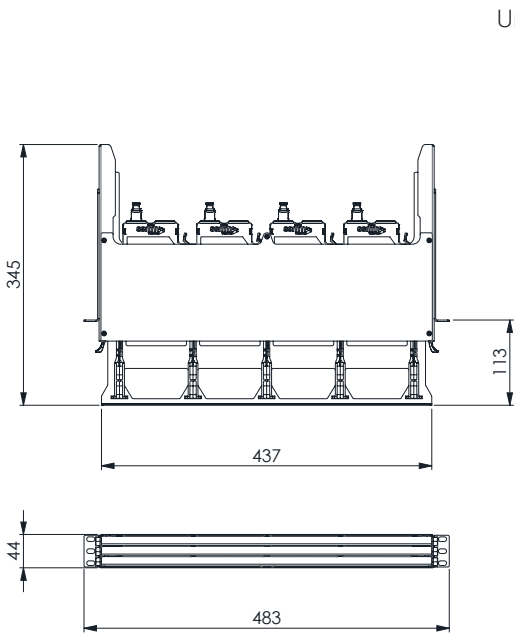

- Modular structure with many different variations
- Configurable tray structure for Base-8 and Base-12 topologies
- Patented Rail Design
- In 1U 144 LC connector capacity
- 3 individually sliding trays per 1U for maximum flexibility during operation and installation
- Patch cord management for each individual tray
- Labelling front for module identification
- Sliding and extracting the modules of the trays for better access to cables during installation
- Modules can be removed and installed from the front and rear side of the trays

UHD MTP-LC Conversion Modules Base-8 / Base-12

This ultra high-density MTP-LC conversion module is ideal for plug-and-play systems. The module hosts 8 or 12 LC adapters in the front and 1 MTP adapter in the back, with the optical circuit that interconnects the front and back adapters. This module has a thin design and a 1U panel can fit 12 modules in it.

Applications

- Entrance facility
- Data center
- Telecommunications room
- Cellular tower base station
- Consolidation point
- Central office
- Equipment room

Key Features and Benefits

- Front and rear installation options on panel rail guides
- Sliding mechanism allows modules to snap into position for quick and easy, tool-less mounting
- High-density: up to 144 fibers in a 1U rack space
- Safety lock design against movement when installed
- Port numbering on the label
- Robust and Strong design
- Complete optical testing

Patch Modules - Base-8 / Base-12

This patch module houses the interconnections between fiber optic assemblies and active equipment, it is designed to facilitate “end-to-end” parallel optics connectivity. It can accommodate standard MTP, LC and SC connectors and has a fiber capacity of 6/12/144 fiber interconnections per module.

Patch Modules snap easily into position with a fluid and robust sliding mechanism, and are compatible with all G-Connect Series high density panels. These modules provide a straight through LC, SC or MTP patching field, which allows trunk cables to be connected directly to patch cords or harnesses.

Applications

- Entrance facility
- Data center
- Telecommunications room
- Cellular tower base station
- Consolidation point
- Central office
- Equipment room

Key Features and Benefits

- Front and rear installation options on panel rail guides
- Safety lock design against movement when installed
- Two sides rear cable entry
- Fan-out divider holder
- Engraved port numbering
- Robust and Strong design

MTP Patch Modules

## High Density Modular Fiber Panels

High density modular fiber panels can terminate, organize and distribute up to 144/288 fibers. These panels are designed to be mounted on 19" rack systems and they have 4 slots, in each 1U unit, that can hold MTP/LC conversion modules and MTP/LC/SC patch adapter modules. These HD modular fiber optic panels are compatible with optional accessories such as pre-installed inner splicing trays, cable tie-up plates, fan-out fixing plates, blind plates, optical adapters and fiber pigtails. High Density Modular Fiber Panels are generally used in data centers.

### Optional Modularity for Different Applications

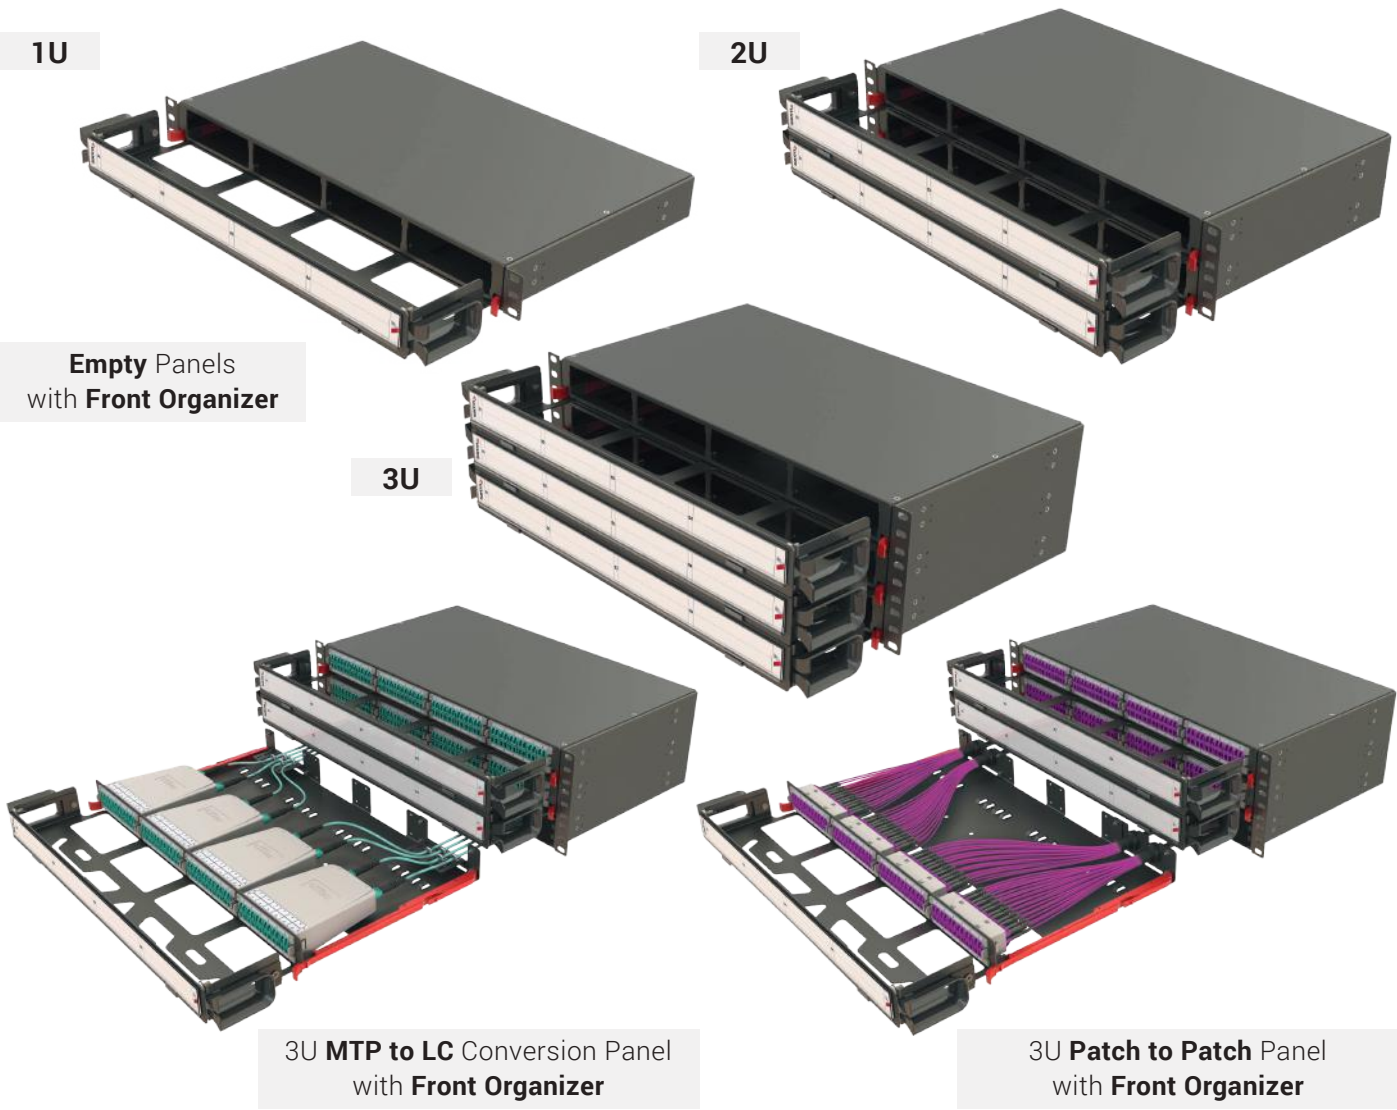

### Panel Capacity

Type of Panel		Conversion Modules	Patch Modules		
		MTP to LC	MTP to MTP	LC	SC
1U Panel (4 Slots)	Module Capacity	12/24	96/144/288	24	12
	Panel Capacity	48/96	384/576/1152	96	48
2U Panel (8 Slots)	Module Capacity	12/24	96/144/288	24	12
	Panel Capacity	96/192	768/1152/2304	192	96
3U Panel (12 Slots)	Module Capacity	12/24	96/144/288	24	12
	Panel Capacity	144/288	1152/1728/3456	288	144

## High Density Modular Fiber Panels with Front Organizer

These panels are similar to the HD modular fiber panels, but they come with a front cable organizer. The front cable organizer is fit for 1U, 2U or 3U sections according to the height of the panel. It helps in saving cabinet space and arranging the cabling system. The smart design of the front organizer offers easier cable management and extends the life of cables, connectors and fiber network components.

### Optional Modularity for Different Applications

### Panel Capacity

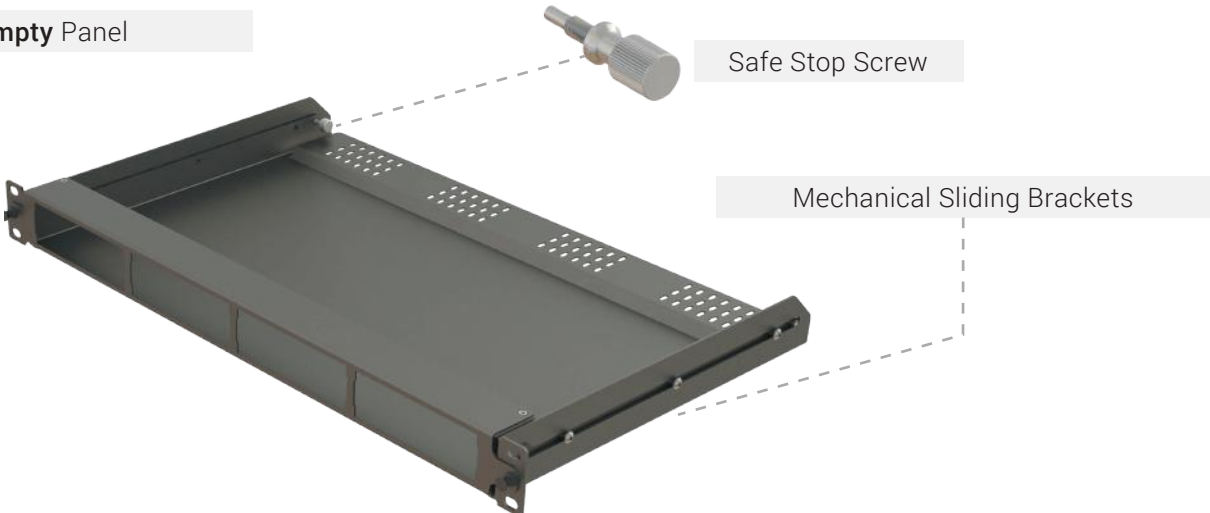

Type of Panel		Conversion Modules	Patch Modules		
		MTP to LC	MTP to MTP	LC	SC
1U Panel (4 Slots)	Module Capacity	12/24	96/144/288	24	12
	Panel Capacity	48/96	384/576/1152	96	48
2U Panel (8 Slots)	Module Capacity	12/24	96/144/288	24	12
	Panel Capacity	96/192	768/1152/2304	192	96
3U Panel (12 Slots)	Module Capacity	12/24	96/144/288	24	12
	Panel Capacity	144/288	1152/1728/3456	288	144

1U High Density Modular Fiber Panels - Easy Series

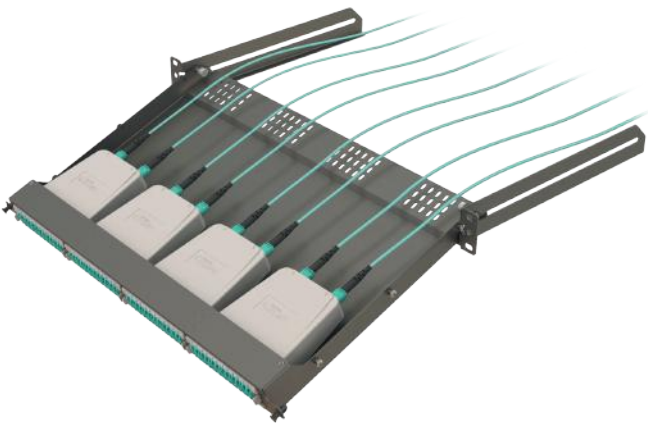

1U high density modular fiber optic panels can terminate, organize and distribute up to 48/96 fibers. These panels are designed to be mounted on 19" rack systems and they have 4 slots in a 1U unit that can hold conversion modules and MTP/LC/SC patch adapter modules. High Density Modular Fiber Panels are generally used in data centers.

Optional Modularity for Different Applications

## High Density MTP to LC Conversion Module | 12 LC-DX

This high-density MTP-LC conversion module is ideal for plug-and-play systems. The module hosts 12 or 24 LC adapters in the front and 1 or 2 MTP adapters in the back, with the optical circuit that interconnects the front and rear adapters. This module has an HD design and a 1U panel can fit 4 modules in it.

## Modular-Type Bright Series Fiber Optic Patch Panels | Mechanical-Sliding, 1U

Modular-Type Bright Series Mechanical Sliding Panel Systems are designed for modularity that allows 3 different adapter module options. These panels can be opened and closed by sliding on the bottom surface of the side walls.

The panels are also available blank or pre-assembled with a wide variety of connector types up to 48 Fiber capacities. Adapter modules can be mounted/dismounted with plastic clip structures.

These panels are used in telecom rooms, main distribution rooms and system rooms to terminate, distribute and manage fiber/copper optic infrastructure in many different applications and needs with a wide variety of fiber optic adapter / connector options such as LC / SC / FC / ST / MTP / E2000 / LSH and RJ-45.

### Features and Benefits

- Interchangeable and modular design for both fiber and copper connectors
- Safe tray lock mechanism with two simple plastic quarter turn lock
- One basic unit fits all types of connectors - providing high flexibility, low cost and easy to handle stock
- Robust and installer-friendly design - providing reduced installation and operating costs
- Different rear cable entry options with PG16 and PG13,5 gland holes
- Screwable design on FO adapter plates
- Fast installation modules with snap in fixation latches
- Adjustable depth in rack
- Powder-coated RAL 9000 (Black)
- Operating temperature: -20°C / +80°C

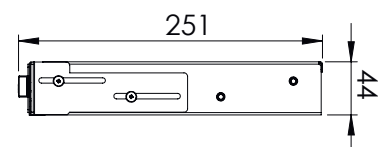

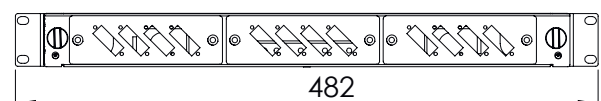

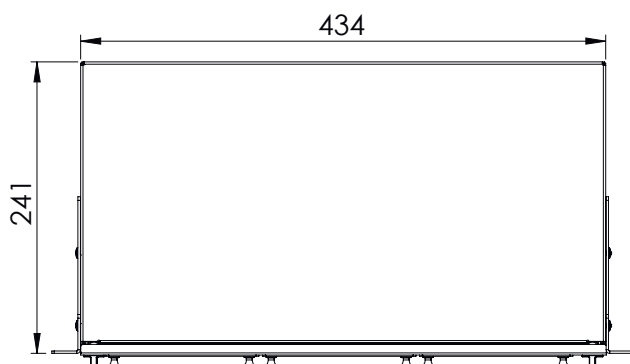

### Compliance/Certifications

ISO 9001:2015 Designed, manufactured and/or distributed under this quality management system

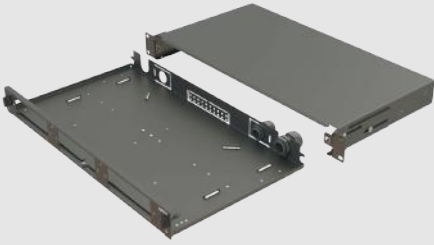

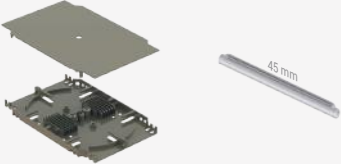

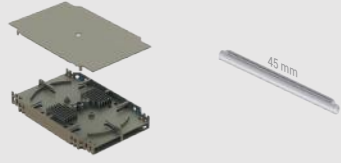

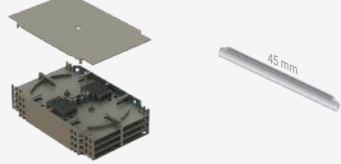

Flammability rating UL94 V-0

ROHS Compliant

## Modular-Type Bright Series Fiber Optic Patch Panels | Rail-Sliding, 1U

Modular-Type Bright Series Rail Sliding Panel Systems are designed for modularity that allows 3 different adapter module options. These panels can be opened and closed on a plastic rail mechanism.

The panels are also available blank or pre-assembled with a wide variety of connector types up to 48 Fiber capacities. Adapter modules can be mounted/dismounted with plastic clip structures.

These panels are used in telecom rooms, main distribution rooms and system rooms to terminate, distribute and manage fiber/copper optic infrastructure in many different applications and needs with a wide variety of fiber optic adapter / connector options such as LC / SC / FC / ST / MTP / E2000 / LSH and RJ-45.

### Features and Benefits

- Interchangeable and modular design for both fiber and copper connectors
- Special plastic rail and locking mechanism
- One basic unit fits all types of connectors - providing high flexibility, low cost and easy to handle stock
- Robust and installer-friendly design - providing reduced installation and operating costs
- Different rear cable entry options with PG16 and PG13,5 gland holes
- Screwable desing on FO adapter plates
- Fast installation modules with snap in fixation latches
- Removable shelf design for installation easiness
- Powder-coated RAL 9000 (Black)
- Operating temperature: -20°C / +80°C

## Fixed-Type Bright Series Fiber Optic Patch Panels | Mechanical-Sliding, 1U

Fixed-Type Bright Series Mechanical-Sliding Patch Panel Systems are designed for termination of up to 96 optical fibers according to the selected front panel structure. These panels can be opened and closed by sliding on the bottom surface of the side walls.

The panels are also available blank or pre-assembled with a wide variety of connector types up to 96 Fiber capacities. 1U fiber distribution panels are flexible to achieve diversified applications in the telecom room and main distribution area, to work with various adaptor fiber optic adapter/connector types such as LC/SC/FC/ST/MTP/E2000/LSH.

### Features and Benefits

- Safe tray lock mechanism with two simple plastic quarter turn lock
- Robust and installer-friendly design - providing reduced installation and operating costs
- Wide range of front plate options for different types of adapters
- Different rear cable entry options with PG16 and PG13,5 gland holes
- Screwable desing on FO adapter plates
- Adjustable depth in rack
- Powder-coated RAL 9000 (Black)
- Operating temperature: -20°C / +80°C

## 1U ATP Series Aluminium Front Patch Panels

ATP series panels are used to terminate and distribute optical fiber cables with high capacity, from 24 to 48 fibers. ATP panels are convenient equipment to organize and connect the fiber optic links, and are designed to be used in telecommunication networks, central offices, fiber optic infrastructure and on-premises fiber networks. Our fiber optic panels follow the typical rack mount standards, and they come with different kinds of optional fiber optic adapters, ports, pre-installed inner trays, accessories, and different types of pigtails

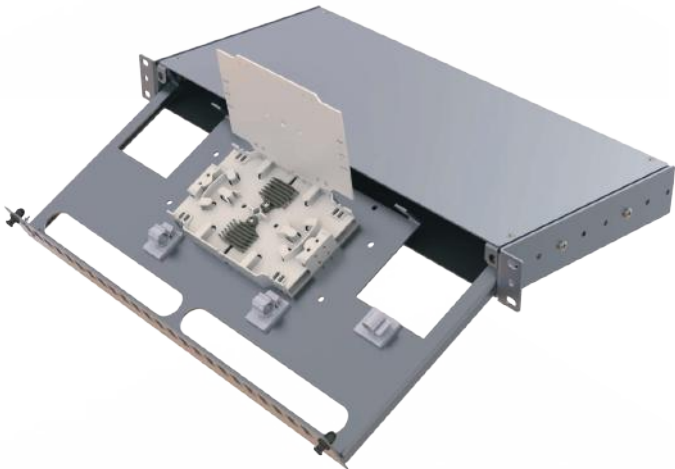

### Technical Data

Material	Anodized aluminium
Color	Aluminium silver
Capacity	48 fibers with LC-DX 24 fibers with SC-SX / LSH(E2000)-SX
2011/65/EC	(RoHS) fully compliant
Module	24F/Module with fusion splice holders
Dimensions	W:482/439 × D:230/200 × H:44 mm

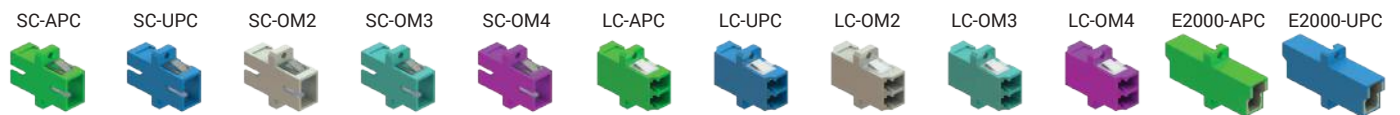

### Characteristics

- Easy and time-saving installation
- Standard 1U 19" size
- Lightweight aluminium construction
- Drawer tilt function for easy access
- Up to 48 fibers per 1U
- 2 perforated plates integrated in the rear of the housing
- Loose tube storage area in bottom of drawer

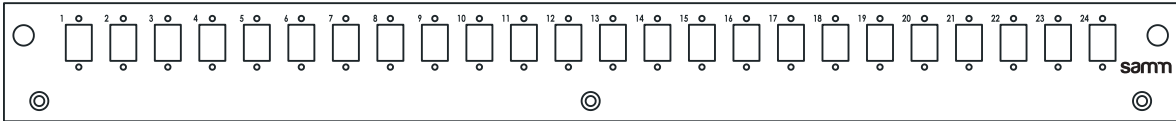

### Adapter Types

## 4U Overhead Mounting Rack Frame

4U overhead rack frame is designed to mount directly to overhead ladder racks or cable trays. Ideal for use as a Zone Distribution Area (ZDA) or Equipment Distribution Area (EDA) in data centers.

The overhead rack frame shall provide additional four rack units above a standing rack or cabinet, in order to maximize real estate utilization in data centers or telecommunication rooms. The frame works as a consolidation point, enabling flexible cabling layout as well as convenient addition of new enclosures and servers.

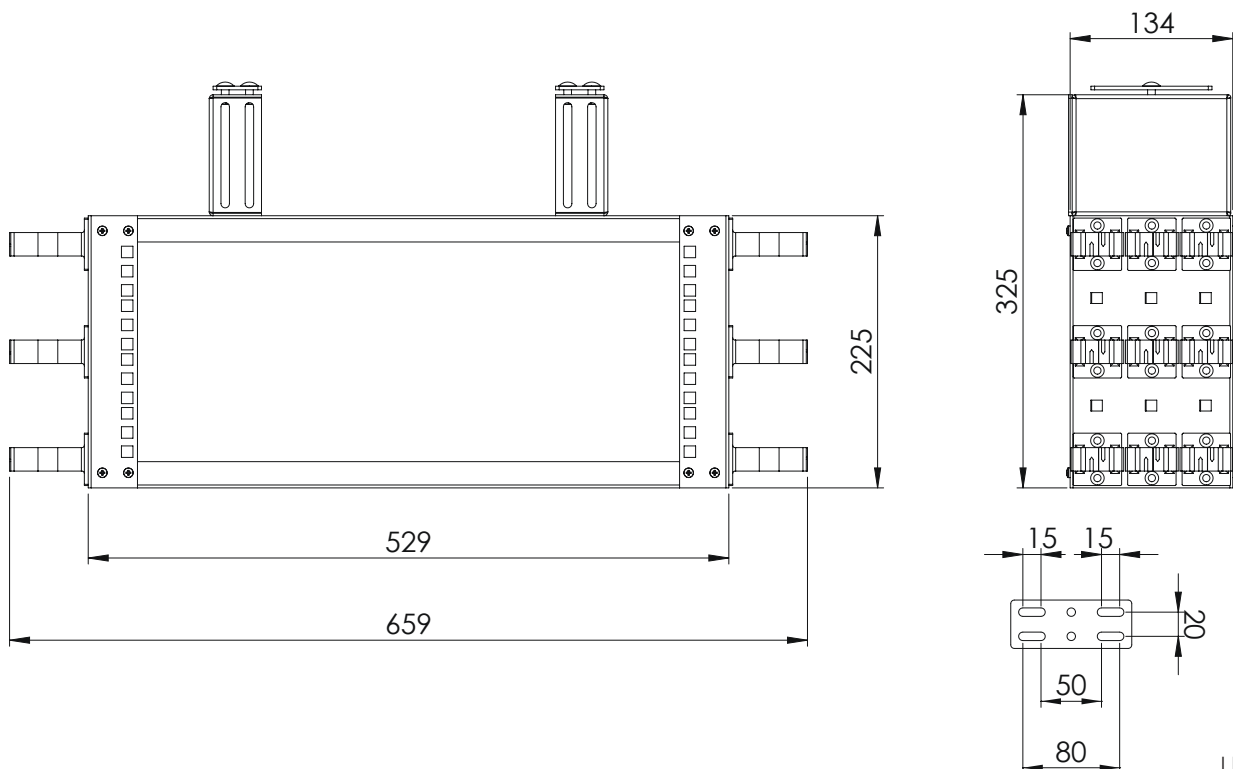

Used with copper patch panels or fiber enclosures, the cable tray rack can increase cabling density, improve cable routing, simplify moves, and provide custom pre-cabled connectivity for rapid deployment of new cabinets, racks, and equipment.

### Key Features

- Applicable to ladder rack mounting
- Applicable to wire mesh trays mounting
- Bottom or side mounting options to cabling structures
- Quick and easy installation
- Rapid data center deployment
- Mounting hardware and cable management included
- Epoxy Powder Paint, RAL 9005, Black

### Dimensions

Unit: mm

## 1U 19" Pass-Through Panel With Brush Strip (Metal)

1U Pass-through Panels with Brush Strip is an ideal solution for routing cables from the front of the rack to the rear. The panels can be mounted on unused rack openings to reduce bypass airflow through open spaces in racks and cabinets. Brush strips provide a barrier to airflow, while allowing cables to be passed from the front to the rear of the rack.

1U 19" Pass-Through Panel With Brush Strip (Metal)

Order Code MT09618

## 19" Tool-less Snap-in Blanking Panels

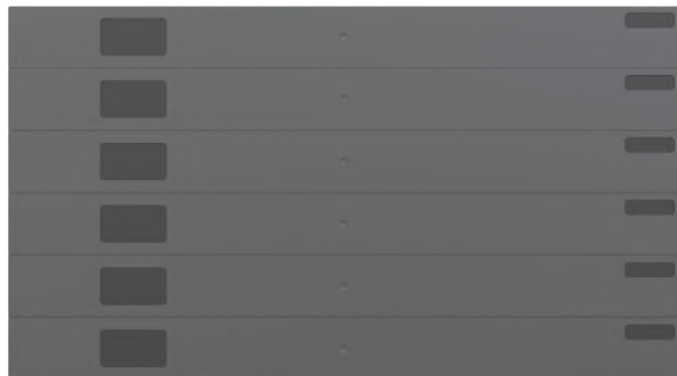

Blanking panels are part of the energy-saving airflow management solutions for smart data centers. They are designed to minimize bypass airflow in racks and cabinets while providing a desirable appearance.

This panel has a knob on each side to be installed and removed easily with fingers grip, and it just needs to be pushed in to snap in its fixed position.

This panel has a latch on each side to provide a more secure lock in position, and it cannot be removed without unhooking the latches sideways.

1U 19" Finger Grip Snap-in Blanking Panel (Plastic)

Order Code MT09617

1U 19" Latch Snap-in Blanking Panel (Metal)

Order Code MT09615

6U 19" Breakable Blanking Panel (Plastic)

Order Code MT09616

This panel is good for closing multiple U sections together. It is made of 6 panels that can be broken apart to fit from 6 to 1 U sections, and each part can be snapped in position easily.

## 1U 19" Modular Cable Organizer | With 5 Snap In Rings

The new concept Cable Management Panel with fully modular rings configuration provides flexibility in Cable Management. Configurations can be vertical or horizontal or can be mixed by rotating the position of the rings on housing. No tools required for plugging the rings onto the cable management panel.

1U 19" Modular Cable Organizer | With 5 Snap In Rings

Order Code MT14351
