

1U Over-length Management Shelves

Over-length Management Shelves are open constructions (no cover plate) which enable storing the over length of cables, micro ducts and patching assemblies. The shelves allow the interception to be realised by means of cable ties, metric glands (for loose tube cables) as well as separable metric glands (for breakout or trunk cables). A wide range of accessories is available for dividing the bundles as well as fibers for a safe and permanent feeding to the compact modules.

Features

- Easy and time-saving installation
- Standard 1U - 19" size
- Lightweight aluminium/sheet steel construction
- Various type of rear and side cable entry options
- Powder-coated RAL 9000 (Black)
