

## Pre-Terminated 6x Trunk Copper Cables | CAT6A SFTP

Pre-Terminated copper trunk assemblies are designed to improve efficiency and reduce labor cost and waste, especially in large infrastructures with high-density cross-connection and patching systems. Based on the highest performing cabling systems available, supporting 10 Gigabit speeds. Six loose jack module or plug modules on both ends of assembly for simple plug and play installation. Ideal for data centers and other areas where quick installation and consistent network connection are important.
